Forecast for Wednesday 20 Dec 2023

Weather: Frequent heavy showers during the early hours of Wednesday, easing off for a time before widespread low cloud and rain soon pushes in from the northwest. Rain heavy at first but easing during the morning, however persisting through the rest of the day, accompanied by very strong winds throughout. Rain turning patchy into the evening.

Chance of cloud-free hill tops above 800m: 30-40% during the early hours, soon reducing to 10-20% around dawn.

Low cloud and visibility: Few or scattered cloud base 600-800m during the overnight period, becoming widespread 500-700m around dawn, persisting through the day. Visibility moderate in rain or showers, poor in hill fog.

Valley	7/5	8/5	9/6	9/6	9/6	9/7	9/6
Freezing Level*	900m	1300m	1500m	1600m	1700m	1600m	1800m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very strong winds, particularly at height, will hamper progress.

Forecast for Thursday 21 Dec 2023

Weather: Mainly light rain will continue through the overnight period into Thursday, clearing to the south through the early part of the morning. It will be drier and brighter behind with sunny spells and just a few showers.

Maximum wind: Westerly 20-30 mph gusting 50-60 mph, easing a little into the evening and veering northwesterly.

Chance of cloud-free hill tops above 800m: 20-30% during the overnight period, increasing 80-90% early Thursday.

Low cloud and visibility: Scattered or broken 500-700m, soon clearing south. Few 700-800m possible behind. Visibility moderate in rain otherwise good.

Temperature: **Valleys:** Plus 8 to 10 Celsius
At 800m: Plus 5 falling to 2 Celsius later
Freezing level: Above summits, falling to 1000m during the afternoon

Mountain Weather Forecast

Ground Conditions Supplement
Date: Tuesday 19 December 2023. Location: Halls Fell (Blencathra) summit at 12:13. Full report: A cooler and drier day than of late, however, strong to gale-force winds were still a feature and were estimated to be in the region of 50-60 mph at times, particularly during the morning. The Lakeland fells are by and large snow-free, albeit apart from a few insignificant snow patches which remain above 800m on and around Helvellyn and its surrounding fells on north and east-facing slopes. Tomorrow's forecast is for another wet day with heavy rain and further strong winds. Anyone heading up high tomorrow should be prepared for challenging conditions. Full winter clothing (waterproofs, extra warm layers, hat and gloves), a map, compass, and headtorch are all essential. Temperature: plus 1.4 C, Maximum wind speed 34.8 mph, Wind chill: minus 4.5 C, Average wind speed: 22.7 mph
